PASCO

Some day a large city will grow up at the junction of the Snake and Co-

lumbia Rivers. HENRY VILLARD.

The Gate City of the Northwestern Empire!

= PASOO.

It are the last parties of wheat and other gran of listen Washington pay tribute to Pasco in their trainst to it is now in the last of the lower Columbia may grown, and a ship building point for big the lower and up; the cumin. The atmost unlimited productions of the lin and Empire are directly tributery to Propose the north the last fund. Pig Band country will pear her wealth of creaks into the lap of Pasco by the form to be a list embers with the last fund. Pig Band country will pear her wealth of creaks into the lap of Pasco by the form to be a list embers with the last of the country will pear her wealth of creaks into the lap of Pasco by the form to be flowed down the Columbia river to Eusco. Coal, line, market copper, lead, sliver, gold and one were reach the world by the distributed of the control are in progress that will soon develop it more rapidly. It has a fine area of arable in 18 more industry of the is new in dem ind.

Profit to the control interpolate of the upper Columbia river valey, is returated on a level plate in which gently slopes to the unitarity it is assupped the Profit costs and near the justine on a level plate in which gently slopes to the material of the Russian and the Profit of the Inginiar with the standard Profit of the material and also within some five miles of the profit on the river that forming one of the granuously junctions of rivers on the Profit of our making Pasco their commercial and it is general.

in a center and r thral dopot or storage point, for the supplies and products of the rich grain producing plateau list the center and r thral dopot or storage point, for the supplies and products of the rich grain producing plateau lists to the center and r thral dopot or storage point, for the supplies and products of the rich grain producing plateau lines in units her or except the lollest country to both send country and Camas Prairie of rich in did on nine countries. I trekt I lat, Wall. Wall willer, brightly country in the eastern portion of Khek in it knows that countries, hown as Howe the virial manual based to eithe ship toward lists of the storage promise railroad point, with three lines diverging therefrom, and about hose it to constructed, gives it rided in a trial countries and countries have rich and countries ridged, as also is the Snake river, near its nouth, with an iron structure that cost \$1,20,000 line of past of Pasto, and of Pranklim country, or it is the country sent, are unexceiled for health, comfort and the growth of all kinds of products, including the semi-tropical.

TIR magnificent location and natural site for a large commercial and distributing city, to exist where Pasco row stands, has induced a number of wealth, pankers, capitalists and shiewd real estate men to form ε stock company, with a paid up capital of \$300,000, for the purpose of developing and building up a city where nature designated one to be.

PASCO.

There is not a spot on the map of the whole of North America where another such a junction of large nu agable rivers meet.

As a water transportation center Pasco rivals St. Louis. Mo. As a railway center it is already the point from which the Northern Pacric's rust system racrates east, west, north and south. The Hunt system of feeders will soon have its terminus at Pasco.

The Union Pacific survey of a road from Pasco to Lewiston along the Snake river has been completed

The Pasco, Portland and Pacific Railway company on the north side of the Columbia river survey is finished,

and estimates of the cost of construction are now being made. Other enterprises are being formulated into shape, such as the First National bank, capital \$50,000.

The Grand Hotel Company, capital \$60,000.

The Pasco Lumber and Manufact tring Company, capital \$25,000, is already chartered and in operation. The Totman House Combany, capita \$50,000, and off of enterprises are being established, including a large irrigating company, etc.

PORTLAND, SAZUBDAY, BEPT. 21. THE CONFFRENCE OF CHARITIES AND CORPECTIONS.

this are sing Portland in amblic meeting will welcome the representatives of the ma-tional conference of charities and correc-tions that has just closed its annual session at Ban Francisco. The visit of these gentlemen to Portlard is not part of their official programme. They only come here and conent to a public appearance as a matter of tended them by Roy. T. L. Eliet, Henry Failing and other prominent citizens who are deeply interested in the philanthropic thought and work of the conference. Appropriate the control of the conference. hought and work of the conference. Among the entinent visiting members of the confer-ence who will arrive to day are Right Rev. George D. Gills-pie, of Mich'gan; Hastings H. Hart, of St. Paul; F. II. Wines, of Springfield, 187; Rev. O. C. McCulloch, of Indianapolis, and other gentlemen of na-tional famo who are associated in the work of this great conference. The purpose of this conference is to investigate the methods of practice I plainthropy, as separated from actinal son inautalism that expires in impulsive, in discrete, injurious, because reckless and indiscriminate, gift giving, and to annually compare the results of this investigation.

gation by free and frank discussion.

The philosophy of wise charily, both public and private, the purposes and methods of penal institutions, and all legitimate social reforms of the day are considered by this conference. The boards of state charities form the basis of the conference, and the number of states that during the fifteen years' life of this national conference have exected such boards is still small and is not rapidly increasing. There have been times were these state boards were threatened wien these state boards were threatened with extinction through the political influence of those whom their honesty had of-feaded. The national conference has met in many of the Northern cities and in Washington, Louisville and St. Louis, but washington, Louisville and St. Louis, but as yet have never held a necting further Bonth, where the saintary stimulus of their meetings lemore deeply needed: than in any other section of the country.

The theory of this conference concerning

the administration of charitable relief is that in the dispensation of public benevoleace, the really belipless and unfortunate should receive first consideration, and the able-hodiel, indolent and dozraded be climinated from their association. This conferer ce believes that the aim of all true chari-table work lies, in the direction of strict table work lies in the direction of strict classification, securing hospital accommoda-tions for the weak and infirm, and workhouse restraint for the sturdy and vagrant; that much of the pauperism, locanity and crime affecting society may be prevented by wise and dis-criminating measures of administration or curred by the function of interference line cured by the timely and intelligent applica-tion of appropriate remodies. The methods of sanitary science include the adoption of stringent measures against the inception and spaced of infectious and confusions dis-cases; and so the methods of these social actentists in dealing with praparism, insuand crime; are directed to the prevention and cure of these cvits, and to the climination of extruseous and improper cases from the long list of the words of the state and the enclicingies of the public-a work that equally concerns the philanthropist, the

pactical statesman and the legislator.
The nut onsi conference of charities and breedings now represents nearly every state the Union, the District of Columbia and the Dominion of Canada. Its published an-muel proceedings are found in most of the public literies; not only in this country, but in Great Britain and continental Europe. To its labors are due many recent improve-ments in this country in the shelter, classifiments in his country in the shelter, classifi-cation, dursing and treatment of the sick, infarm and in ane poor; in the care and training of dependent children, now more generally separated from the adult paupers; in a wiser and more discriminating administration of out-door poor teller; in the gradual adoption of near control of the control of th

more efficient reformatory methods in dealing with the delinquent, yagrant, and criminal classe; in better facilities for the education of the blind, deaf and dumb, idiotic and teeble hunded, and in a wiser, more eropomic and fuller accounting of the public expenditures for charitable and correctional

One of the results of the labors of this conference in the past was the action of the faite of New York, which, at the instance of its state board of charities in 1875; provided hy legislative enactment for the removal of all its dependent children from poorhouses and almakouses, and prohibited the commit-trent of such children thereafter to these k stitutions, and by subsequent legislation p ovided or the separation of its truent and Vegrant children from adult criminals. The economic value of methods that res-

son thrown upon the public at birth and continuing dependent through life will cost-the contrainty \$3200, and it we add the legal annual interest the expenditure will exceed four times this amount.

The wide scope of this field of practical pallantoropy, to whose consideration and discussion the national conference of charities and corrections devotes itself is set forth. if the list of themes presented to gettlera-tion and cebate before ter Theenth annual ssssion, held in Tondato, N. Y., in July 1888, tottown: "Provision for the Insane;" "Tovision for the Feeble-minded and Bind;" 'Organization of Charities;" "Outde or Post Reffer;" Munic pal Charitles;"
"minigration;" The Reformation of Prizoners;" "Industrial Training in Juvenile Reformatories;" "Cure of Dependent Chil-

Among the eminent speakers and writers Among the eminent speakers and writers who have appeared before this national conference in the past and confinite to serve it are Falix Adler, F. R. Sanborn, General S. D. Armstrong, Dr. J. P. Bancroft, specintendent of the New Hampshire asy um for the insanw; Ex-Governor Fairchite, of Wisconsin; Stephen Smith, M. D. for many years the head of the Beauty. Faircanic, of Wisconsin; Stephen Smith, M.
D. for many years the head of the Board of
Hacith of New York City; Rev. Dr. S. S.
Mitchell, Ex-Goyennor Moody, of Oregon;
Robert, Treat Paine, Rev. Dr. Peabody, of
Harvard Divinity school; Rev. Myron
Reed, of Denver; Helen F. Spaulding, of Portland, Or.; Krs. Charles R.
Lowell, widow of the brilliant General Loweli, who fell in a cavalry charge at Cedar

Creek and F. H.

The question of "Who started the fire?" but fair to meet with an unsatisfactory response as the pathetic inquiry for the slayer of "Cock Robin." So far as has yet transpired so one applied the march to an individual brush pile and the predulous public mast fall back upon the theory of spontanceus conjustion, bottle its wrath, positive its eyes and rasign itself with becoming humility to the mysterious dispensation of providence that caused the woods west and north of the city to bless furiously throughorth of the city to blese furiously through

The loases from fire in the Northwest during the past four months are enormous. Be-sides the immanse sum lost in the actual de-struction of buildings, the blow which the industries of various acctions has received has been exceedingly heavy. The latest record is the loss of a milit plant at Sucho-much, worth \$150,000, which, taking into

consideration the fact that it was crowded without specifications they pass as any other with orders, and was running night and day on contracts with Scattle builders, represents but 4 portion of the actual loss. Energy and enterprise have not, however, in a single instance been more than temporarily taggered by the calomity that has overaken them during the stimmer, but have some to work at once to repair damages. The Snobemish mill will be rejuit as soon as possible, and although great inconveniince will necessarily result to builders and the loss of wages will press heavily upon the arge number of men thrown aut of employment, there is a disposition to make the best of the situation that is at once commendable and philosophical.

THE WASHINGTON CAMPAIGN.

The denjocratic campaign in Wast ington is not an open and direct one, it is not based or conducted on any general principle, but s carried on in various wave and on various pretences, as the exigencies of politics are supposed to require. The managers of the campaign are for or against the constitution, according to the locality they are in; and even in the same locality they will, profess to be for it or against it, as they see opportunity to make points for their party. They expect the constitution to carry, but whenever they can hope for a party advantage by opposing it, they constantly do so and, at the same time sedutously endeavor to turn all the opposition to the constitution that can be fanned into flame into votes against republican candidates, particularly the constitution. the candidates for the legislature. The argument is that it was a republican conven-tion that made the constitution, and now if you see anything in the constitution you don't like you can and should manifest your disapproval, by voting against the constitu-tion, and, at the same time by voting for the democratic candidates for the state offices and the legislature. Then even if the constitution should carry, the republican party would be rebuiled. There may be those who do not see that the whole purpose of this node of campaign is to get an advantage for the democratic party; yet every one ought to see a thing that is so plain.
Criticism of the constitution is based al-

most wholly on the allegation that it creates too many offices and allows too high staries.

A state government no doubt could be con-Jucted with a smaller number of officials for the present, but a constitution is or the future as well as for the present time, and Washington is increasing in population and wenith at a rate that will soon require all the official services that the constitution calls for. Nor are the salaries too high. Men of ability and capacity cannot be expected to enter the public service unless they are decently paid. Nothing is more pitiful than invidious comparison of the salary o, a justice of the supreme court with the daily tine of the suprame court with the daily wage of the common laborer. Nobely but a pultry demagogue will adont so lon an ex-

It should not be forgotten that while the constitution creates seventeen superior judges it does away with thirty-four probate judges, and in this particular, therefore, it is a positive measure of economy. Again, the state is to pay one-half the salary (I each superior judge-a provision that 'circetty' layors the smaller counties. In her school fund Washington has a rich heritage that she can come into only when she becomes a state; and, as her fund will be more than ample to support all her public schools, williout special tax, the people of the state, by adopting this constitution and rutting their state government in operation, will quickly put an end to special fina ion for school purposes, and thereby will save enough to incet all the expenses of the state establishment. The fact should be renormbered, that much of the value of the school lands consists in timber, and that this timber is subject to great waste, both from Fre and from encroachment by those who lake what is not their own. Administration of the school lands should, therefore, by assumed by the state without delay. This is in ini-portant reason for adoption of the constitu-

The controlling desire of the democrats of Washington is obtainment of a majo ity in the legislature. To this desire the campaign on their side is wholly subordinated. Where votes can be made in this behalf opposition to the constitution is urged, candidates on the state ticket are to be awapped off, and promites are made of support for different points that applies to be the capital of the state. The democratic campaign in Washington is carried on through all these Washington is carried on through an tness devious ways, and not at all on any general principle or pedicy. But the people, we think, are largely for the constitution, and republicans should be united in support of their state and legislative tickets.

Mrs. Robert Ray Hamilton, one of the principals in the Atlantic City scandal of a few weeks ago, has been sentenced to two Vaggant children from adult criminals.

The economic value of methods that resons over one oven one person from pauperism, interning the everage duration of human life at 32 years, the yearly per explin expense of an antennee and care, exclusive of shelter, and fill at ort of \$100, so that each person thrown upon the public at high and an arishocratic name, is probably not the inmocent victim of the templer's wheathat his
well-feed lawyer is antent upon making him
appear. Nevertheless, the road to divorce,
sympathy, notoriety and possibly the lecture field, is well paved for him law to come,
his responsibility in gringh be seens to shirk
by the regulation press, "The woman besympathy, notoricty and possibly the lec-ture field, is well pared for thin hyperstene, his responsibility in minch destacts to shirk by the regulation Total, "The woman be-

The nocturnal wood saw is abroad, vexing The nocturnal wood saw is abroad, vexing the drowsy ear of hight; and what is much more to the point—the drowsy er of the worthy citizen as he presses his pillen vainty wooding the coming of sleep. The only initigation of this aggravating nulsaneeds that it must, from the very nature of ceaseless industry which characterizes it at this seaso tof the year, shortly run its course. The citizen who is auxious forget his wood housed before the fall rating begin is to be commended. fore the fall rains begin is to be commended for his thrift, and the proprietor of the ma-chine with the rasping voice cannot be blamed for wishing to make as much as pos-sible out of his fall harvest, so it seems that the annoyance of which complaint is made is one of the evils that must be telerated in order that good may follow.

Some weeks ago a purty of fifty American workmen, desirous of judging of their own condition by comparison with that of their fellows in Europe, crossed the water to make observations. After spending some time among the workingmen of England, France nd Germany they returned home, reaching New York last week. It is needless to say that they came back fully satisfied to pursue their various callings under the at its and stripes. They found that the Atterion their various callings under the aters and stripes. They found that the American workman is better paid, better housed, better fed and better clad than his European comrade. Their observation but adds to the fact, well authenticated before, that the United States is the best country in the world for the man who works for a living.

The Union army during the war of the rebeilion had on its rolls 2,883,-900: The confederate armies had on their rolls 1,632,000. Of the Union army onerolls 1,652,000. Of the Union army one-fourth, 700,000, still survive, of whom 400,000 are enrolled in the Grand Army of the Republic. At least 350,000 confederates live to recount the stories of hardship, puril

Charges of discrimination in the matter of enforcing the ordinance prohibiting the ob-struction of the sidewalks by a display of

growls, merely being placed to the credit of a splenetic disposition that must have something to feed upon . When, however, they

was girbu in trust to that university. The income of one-thirl of this fund goes to Nule observatory and the remaining two-thirds to Henry B. and Francis L. Loomis, the former a resident of Scattle. Such a hequest proves that Professor Loomis was not in educational work solely for the money that was in it for him, but that there was a principle and devot on underlying his life-

MONEY TO 1011

WHOLESALS DEL

OBATIOL ROLL). A rom fi 20 un But Mater a A s t fit A s t fit we Warks, at the

Chief Justice Hanford of Washington territory has been dealing out penalty to desi peradoes with an unsparing hand. The three vicious vagrants who, in an attempt to break all on the 5th mat, set upon and mearly ailled the jatier were given a com-bined term of eighty nine years in the peni Lentiury, two receiving thirty six years each

and the third seventeen years

There is something hope ul for the community in such penalty as this. It is a grand improvement on a sucression of sentences aggregating this term of years in the inter wals of which somety suffers from the depre-dations of the criminals! counting itset dations of the criminals, counting itset fortunate if murder is not added to their lesser grimes. A punitave policy that is half coaxing and builds upon a trust in the honor of theres fails with desperadors of the typ of these Scattle criminals. There is but one thing to do with them, and that Judge El u ford has decreed shall be done. It is true that they are within the reach of pirdor but while they maintain a ricious and def and attitude this is not likely to come reathem; the more especially as they have been hand to-mouth thieves so to speal. Not having hourded money from their stealings they have nothing with which to tempt legal cupidity to enter the lists in their favor for

the ptrpose of defraucing justice.
It may be well that humanity labors and reasons with steel to prove that there are in the great mass of criminals but few con paratifely who can justive be termed into rigibles. When, however, these are foun-and every device of kindness correction and tolerance has failed to reform hem it is the Just due of society that penalty be laid upon just due of society that pensity be last upon them with a force that will render them poweriess for harm. A long sentence of impri onment faithfully carried out with rigorous but bumane discipline, hard work coarse food and due attention to san stary conditions, is at once the safeguard of society and the protection of the criminal himself—from himself and a nossible we remove of a repeated to outraged public. It is gounce of a repeatedly outraged public. It is not the case of the incorrigible, after he is not the case of the incorrigible, after he is anknowledged to be such, that puzzles the ingenuity and taxes the patterne of the phil anthropist. In imposing upon those desporate otherwise ungovernable and heretofore angoverned cruminals the longest sen tence of imprisonment ever passed in Washington territory. Judge Hanford has done well, and the public must rejoice that two desperadoes at least will not again menage the peace and security of this gen-

RELATIONS WITH CANADA

The people of New England are strongly In people to New England are strong, in favor of reciprocity with Canada New England protectionists and free traders are agreed that custom houses should be abplished along the border line between this country and Canada. New England is anxious for free trade with Canada because in that case coal, coke iron and copper ore could be landed at the docks of Boston at prices that could erable New England's declining metallic industries to compete with those of Ohio and Pennsylvana. Rurdeermore, under recipronity Boston would be the port of entry and departure for the steamer lines which control the pas-senger the export and import trade of Canara. In a recent report of the state department Mr Hotchkiss, the United States consul at Ottawa gave some interesting and valuable figures of the commerce of Canada and especially of the trade relations of the Dominion and the United States, showing that Canada's trade with this country is much greater than with Great British We quote

Eviluin We quote

The trade and navigation returns for the fiscal
year of 1885 show boyond question that the most
profitsible and natural market for the products of
Canada is in the United States. Canada sold to
the United States in 1885 merchandise to the value
of \$42,072,960, and to oreat Britain \$42,074,354,
show by an excess of sales to the United States
of \$500,000. The imports from the United by tes
mean for \$45,000,000. vere \$49 481,848, or \$9 000 000 greater tian from Freat Britcin The volume of trade with G eat Brita.n-imports and ex ports-was smaller in 1888 than any vent since confederation (in 1.67) while the transaction with the United States were larger the trunsaction with the United States were larger than many preceding rear, except in 1883 and 1883. One half the exports of Canada of lumber and other forest products pre disposed of in the United States, over three fourtns of the minerals, two-birds of her agricultural products, nearly one, built of her fish 40 per cent of her nearly factored articles and pra treatly all of the misselfs rough products.

The United States sentate committee on relations with Canada closed its four day se-sion in Roston on the 14th inst. A number of representatives from cities of commercial importance were examined and ther ununimously favored not only rebut appexition Reciprocity possibe A reciproc ty treaty existed be tween the United States and Canada for Emeryvayears from 1851 to 1858 Its renewal was actented owing chicfly to the natural ind grat on felt by the American people be and c C; and a had beer a wase of asyldim for Confesterate parates and fire-bugs" seeking to rob our banks and fire, our great cities. At this distance from the civil was it to reaspine ble o suppose that a reciprocity trenty with Canada would not be opposed on senti mental grounds, but the question of annexa tion is a different thing. Of course annual tion will never present itself until Canada fakes the mutative with the consent of Lingland, and that day is far distant. On land, and that day is far distant 1 On grounds of sentiment Canada would, not copsent o annexation, and even it should Lagland would not sanction her device Carada is worth for more to Lagland than she was twenty years ago before the Cana dian Pacific connected the Canadian sea-board with the Pacific But even if we as nume that Capada desired annexation and England consented we do not believe the United States would accept Canada. Finan on ter states would accept contain. First can be cally Canada's enormous debt would make her a bad bargain but more than this her annexation would be a dangerously disturbing political influence. There are many From the Canadans already in this country.

They are to a mun advocates of parochial schools where the French language is taught to a means of keeping dive the sentime it of nationality and religious faith to the evolu sion of our fundamental American ideas of government Few of them become natural issed According to the returns of the Massa neette ceneus for 1885 of 22 427 French Canadian males above 20 years of age

but they are even more stubbornly con assimilative people than the most worthless of European immigrants

17,292, or 77 10 percent, were aliens. Comparison with other nationalities above that this percentage of unnaturalized to the whole number of males 20 years, or more of age to exceeded only in the case of the low italians from leaples and Calabria and he Chinese The unnaturalized Irish in Missachusetts are but 36 25 per cent although they are of the same religious faith with the French Canadians and the unnaturalized Germans are but 41 per cent of the wasie number The showing of unnaturalized French Cana diens is ju t as b d in Vermont that has 24 000 in New Himpshire, that his 25 700 in M inc that his 19 000. Here we have already in the United States a large body of Frence Cauadians holding themselves afoot and distinct from the rest of our population with 10 purpose of becoming citizens an unassimilative element as barron of politica wigh and life to our social I (as the Chi-nese. The reason for this action on the part ness. The reason for this action on the part of the French Canadians is that they are a priest ridden superstitions in I c'ildish race, beyond any other children of the Cath oldel urch This is shown further b the fie that a therence to the Roman Cataolic church was a de the con inton of rep e entat ou u the recent I ren h Canadian con renton held u New York city. The Canadian people mee 1 of hive byed under a o strution that it c see tighty nothing more than an attempt to trunep and the Fuel of system of government to the oil of Can d: The legisleture consists of the quest represented by the givernor general a senat nerse which are a pointed to life by the governor general and a non-ef-commons chosen by the people for five years. Under our conditution he government of the United states is upreme within is sphere but the continuous of the acadies not endow its government with my surrome power. The imperial parliament has concurrent power over all matters within the legislative jurisdiction of the Dominion or the provinces. Any colonial law rejug-ment o any act of the impercal parliament extending to the colony to Which such law relates as to the extent of such repuenancy youl" is the language of the act of 1867 Under this form of government he Canada inn people have lived with seeming content and it is fairly said that "this fact is a cogent argument against annexation.

Another argument is the ruce a air religious batred, that under the Canadian constitution

AN IMPORTANT ALLUTION

has grown up between Canadian Protestant

United States might accept reciprocity but

public schools supported by the state

Uatholics on the question of separate

The importance of the elections impending in the four territories which are soon to be admitted can hardly be "anggerated When congress shall meet in D cember the Fifty-first hou e will include 6-republicars and 161 democrats already e ected Before the meeting of congress representatives will be elected in North and South Dakots in Montana and in Washington The demo-orats are disposed to concede that the repub-licans will probably carry both Dukotus and Washington, but claim Montana as democratic If the republicans win in the Dakotas and Washington the net gain would be two and the house would stand 178 republicans to 162 democrats. But the republicans of Montana do not admit that the democrats will elect the member of congress and a vig orous campaign is in progress Monland gave a republican mijorate of more than 5000 in 1888 but showed a small democratic majority in the elections for the constitu-tional convention. Montana is fair fighting ground for republican victor; and the par y has no reason to despair of winning it.

It sof the highest importance to win all

these states at their birth as the impression made by such a victory would probably keep there new states all republican for some years to come and at least secure the elec tora vote for the next national election in 1892. The New York Sun (Peru) is evident y alarmed at the energy of the repub-lican campaign and warns be democracy to be up ind doing or they will urely lo e the rich prize of all four of the new states

rich prize of all four of the new states. We quote A few rears of republican control, and it will bear so deeply the form and pressure or republicantism it at only extraordinally discussional efforts can change even temperarily its allegiance to the party which possesses it. The republicans see what advantages will come to it ose who can stemp their ideas upon the institutions and the public opinion of a coremunity in its plastic and doctic stage. And Joy see that to win these four states is to win an empire for no man can out a limit to their possibilities of man can put a limit to their possibilities of growth and greatness.

Isn't it about time for the demograts to b. doing

something out in the new West. Does the demo-eratic national committee appreciate the value of the stakes to be played for in the new states.

CENTRALIA FOR THE CAPITAL. Many Great Advantages-Rail coad and Business

CENTRALIA S pt 19 1859 The Centralia Ners has undersone a chin ge of munagement and will be publi he lin future as a democratic organ 1 is our only delty bu as we have got an able republican we key we can affect m unagement and will be publiked in future as a democrate organ. It is our only deily but no swe have got an able republican we key we can aff rid to let the democrate I ave the as vices of the Mose. The racket in favor of locat in the state or pitch here is still going on. The Board of I rade is sending our jampulets with illustrations showing the central position of Cent all and its suitability above all other parts of the rate for the location of the capital. The construction of the rail road to Gray is Harboris going shead rapidly and the Port Townson I road will e-publed forward during the winter and spring. Recent de over ica, of rich in new of coal aron and oth cost along the Wilton and the upper basin of the Cow litz will compell the Gray's Har or people to push their railroad right through the headwater of the Cow litz will compell the Gray's Har or people to push their railroad right through the headwater of the Cow litz will compell the Gray's Har or people to push their railroad right through the headwater of the Cow litz will compell the Gray's Har or people to push their railroad right through the headwater of the Cow litz will compell the Gray's Litcher's for sait cap is don't in support of the Lictor's for sait cap is don't in support of the Lictor's for sait cap is don't have done and like vast mapping of the theory of the cast cap and the vast mapping of the chackes of the North Yakima and Fliend urgh is skillfully meneuvered by we I known capitalists at Taxoma and Scallle and the independent agricultural Liement east of the two mans; will 10 to be in boosted into voting for certa a blaces for the ben effort and east to whomes.

BELLIGERENT SOUTHBONS.

Georgia Legislators Who Will Probably Settle Heir Difficulty According to the Code

ATIANTA Sept 20—The Georgia legisla ture was quite belligarent yesterda and last night and three couples of repre entat ves are negotiating through friends These ne gotiations may end in explanations on the floor or in yests to the surrounding states for the purpose of fighting. The first and floor or in visits to the surrounding states for the purpose of fighting. The first and second unsunderstabilings arose during a debate on the proposed industrial school for girls, and the third on the proposition for the legislature to visit the bat lefield of Chickimanuga. The three sets of candidates for admission to the dueling ground are Representatives Tignor and Athi son below and Brooks and Lonte and Thurman

Fattins of d gestion cause disorders of the liver and the whole system iccomes deranged. Br J H Welson a Sarsaparila perfects the process of digestion and assimilation, and thus makes pure blood.

WOULD BE FIRE IN NEW YORK Wish Visitors Think o "The Pertiand" Its Sist and Beauty Cons Actionishm at

Our citizens have become so recustomed to the The-Lorland our big h w noted from its having been started so long togo that they do not realize what a lerge and hand one built ing; is. Judge M H Este a promition dilter or Carlforn took a look at The Portland peaterds) and ex took a look at The Portland Malerday and expressed surprise at shell a such a sine building there why said to that would be a fue hotel at New Mark 1 to He was still more surpresed when told that I was appected that The Portland would be easily to receive gut to entirely in the company would be deing well if they got it ready for next immers business hot with-triding tont see No stories of stone were storied and completed horse down the rest of the hopfelding was put up in hor order owing to the remarkably line weather less where we do not a sine of the control of the said of the said

UNCLE SAMUEL SUED

Astion Brought to Ben v r \$1230-The First Suit oft = II '

The ridiculously but it unlines made by the late, unlaunched Come without shorks, of the goal hand office have caused a great deal of the side in the Northwest. Many per consulted to the index in claims under the trader land act, and pend \$2.50 per acre for them, could no get a pend to them on acrount of Sparks, ruling that hely were agricultural lands. A number of persons brought soit against the government to going in sequence of her patents, and Judge

issue patents, and the government at it i c'deon to the money paid for the 'and as well as to se land

real.

Now an attempt is to be made to he the government to disgorge the money it has taken for these lands. Yeaterday Mr. Zera Snow as coomaged for A. C. Emmons, to whom three ter on have assigned their claims brough sin to the Linted Bates circuit court agains the U ted States government to recover \$1230 the amount paid far three disarter sections of land and all lib lor advertising each.

This is the first case of the kind prought, and the result will be looked for with introst, as the government is holding \$100 for a great many people in this section.
